62 Tonnar Johann Mathias, +07.02.1784 Eupen

63 Dobbelsstein Maria Catharina

VI. generation

100 Neumann Johann

101 Mescher Agnes

30 ancestors over 6 generations of Jacquemin (Knabe) are known.

The numbering system used is known as the Eytzinger- or Sosa-Stradonitz-Method. The subject (proband), here Jacquemin (Knabe), of the ancestor table (Ahnentafel) is listed as No. 1, the subject's father as No. 2 and the mother as No. 3, the paternal grandparents as No. 4 and No. 5 and the maternal grandparents as No. 6 and No. 7, and so on, back through the generations. Apart from No. 1, who can be male or female, all even-numbered persons are male, and all odd-numbered persons are female. In this schema, the number of any person's father is double the person's number ($2 \cdot n$), and a person's mother is double the person's number plus one ($2 \cdot n + 1$).
